# REPORT.

---

TO THE RIGHT HON.

ANDREW GRAHAM MURRAY, K.C., M.P.,

*His Majesty's Secretary for Scotland.*

---

GENERAL REGISTRY OFFICE OF BIRTHS, Etc.,

EDINBURGH, 7th April, 1904.

SIR,

I HAVE now the honour to submit to you, in accordance with the requirements of the Scottish Registration Act (17 & 18 Vict. cap. 80), a General Abstract of the Births, Deaths, and Marriages registered in Scotland during the year 1903, drawn up in the usual form, with a view to its being laid before Parliament.

I have likewise the honour to submit to you, in accordance with Section 19 of the Vaccination Act (26 & 27 Vict. cap. 108), the Thirty-ninth Annual Report on Vaccination, which includes all the usual details relative to children whose Births were registered in Scotland during the year 1902.

I have the honour to be,

SIR,

Your most obedient Servant,

STAIR AGNEW,  
*Registrar-General.*

# REPORT TO THE REGISTRAR-GENERAL.

BY JAMES CRAUFURD DUNLOP, M.D., F.R.C.P. EDIN.

---

SIR,

I have the honour to submit the Forty-ninth Annual Report regarding the Births, Deaths, and Marriages in Scotland. In it there are given details of the Births, Deaths, and Marriages registered in Scotland during the year ending 31st December 1903. I also submit the Thirty-ninth Annual Report on Vaccination, in which is contained information relating to the administration of the Vaccination (Scotland) Act, 1863, more particularly regarding the vaccination of children born in Scotland during the year ending 31st December 1902.

## POPULATION.

The population of Scotland at the middle of the year 1903 is estimated to be 4,579,223—the males numbering 2,229,414, the females 2,349,809. The corresponding figures for 1902 were 4,531,299, 2,204,503, and 2,326,796. The increase of estimate—namely, 24,911 males and 23,013 females, in all, 47,924—is based on the average annual increase between the Census of 1891 and that of 1901. Excess of births over deaths during 1903 amounted to 57,526. The difference between that figure and the estimated increase, namely 9602, may be taken as the probable effect on the population of emigration and immigration.

Of the total population, 2,028,355, or 44·29 per cent., are in the Principal Town districts; 594,745, or 12·99 per cent., in the Large Town districts; 920,460, or 20·10 per cent., in the Small Town districts; 920,455, or 20·10 per cent., in the Mainland-Rural districts; and 115,208, or 2·52 per cent., in the Insular-Rural districts.

## BIRTHS.

The births of 133,499 living children were registered during the year 1903. This is equivalent to a birth-rate of 29·2 per thousand of the estimated population, and is the same as the birth-rate for the year 1902, and is smaller than that for all other preceding years.

Of the 133,499 births, 68,074 were males and 65,425 were females, which is equivalent to 104 male births to 100 female births. The male birth-rate per thousand of the estimated male population amounts to 30·5; the female birth-rate per thousand of the estimated female population amounts to 27·8.

The birth-rate in the Principal Town districts amounted to 30·6 per thousand of the estimated population, in the Large Town districts to 31·3 per thousand, in the Small Town districts to 29·2, in the Mainland-Rural districts to 25·5, and in the Insular-Rural districts to 21·5. The birth-rate has thus, as usual, been highest in the Large Town districts, and smallest in the Insular-Rural districts. Of the total births, 62,025, or 46·5 per

cent., were in the Principal Town districts; 18,627, or 13·9 per cent., in the Large Town districts; 26,903, or 20·1 per cent., in the Small Town districts; 23,464, or 17·6 per cent., in the Mainland-Rural districts; and 2480, or 1·9 per cent., in the Insular-Rural districts.

Of the 133,499 births, 8183, or 6·13 per cent. of the total births, were registered as illegitimate. This is the smallest rate of illegitimate births recorded by this Office. The rate, as may be seen in Table I., appeared to increase from 7·88 in 1855 to 10·27 in 1866, but that increase may have been more apparent than real, possibly being partly due to more perfect registration at the latter date. Since the maximum in 1866 was reached

TABLE I.—Population estimated to the middle of each year, with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1903, and their Proportion to the Population; also the Excess of Births over Deaths, the Number of Illegitimate Births, and their Proportion to the Total Births.

YEAR.	Estimated Population.	BIRTHS.		DEATHS.	MAR-RIAGES.	Excess of Births over Deaths.	Rate per 1000 of Population.			Percent. of Illeg. to Total Births.
		Total.	Illegit.				Births.	Deaths.	Marriages.

1898	4,344,589	130,861	8,870	78,337	32,112	52,464	30·120	18·045	7·391	6·78
1899	4,390,530	130,733	8,486	79,593	32,978	51,140	29·776	18·128	7·511	6·49
1900	4,436,958	131,401	8,534	82,296	32,444	49,105	29·615	18·548	7·312	6·49
1901	4,483,880	132,192	8,359	80,107	31,387	52,085	29·482	17·866	7·000	6·32
1902	4,531,299	132,250	8,202	77,946	31,878	54,304	29·186	17·202	7·035	6·20
1903	4,579,223	133,499	8,183	75,973	32,320	57,526	29·153	16·591	7·058	6·13

there has been a steady diminution: in 1874 it fell to below 9 per cent., in 1889 to below 8 per cent., in 1898 to below 7 per cent., and is now as stated 6.13 per cent. Not only has the rate since 1866 decreased, but the actual number of illegitimate births has also done so. In 1866 they numbered 11,673, since 1877 they have been fewer than 11,000, since 1888 fewer than 10,000, and since 1898 fewer than 9000.

The illegitimate birth-rates were in the different districts and in order of magnitude thus:—Mainland-Rural districts 8·3, Principal Town districts 6·0, Small Town districts 5·6, Insular-Rural districts 5·2, and Large Town districts 4·6. Compared to those of last year, these rates in the Mainland-Rural and Principal Town districts are the same, in the Small Town districts increased, and in the Insular-Rural and Large Town districts diminished.

The frequency of illegitimate births in the eight geographical divisions and in the thirty-three counties of Scotland is to be seen in Table VI. It will there be noticed that in the eight divisions illegitimacy is most frequent in the North-Eastern and Southern, and least frequent in the West-Midland. In this respect the returns of this year are similar to those of 1902. Of the counties, illegitimacy was most frequent in Elgin and Wigtown, and least frequent in Shetland. In six counties the rate of illegitimacy exceeded 10 per cent., namely in Elgin 12·7, Wigtown 12·3, Banff 11·7, Aberdeen 11·0, Kirkcudbright 10·9, and Roxburgh 10·5. In four counties the rate was less than 4 per cent., namely in Sutherland, where it was 3·9; in Ross and Cromarty, where it was also 3·9; in Dumfries, where it was 3·6; and in Shetland, where it was 1·5.

The average daily number of births for the year was 366 (*see* Table XIV.). The months in which the daily average was greater were—June (415), May (392), April (392), and July (376); those in which the daily average was less than 366 were—November (331), August (346), February (347), September (351), October (355), January (359), December (360), and March (363).

## DEATHS.

During the year 1903, 75,973 deaths were registered in Scotland, which is equivalent to an annual mortality of 16·59 per thousand. The actual number is less than in any year since 1896, and the mortality-rate is the smallest recorded since the opening of this Office, now nearly fifty years. Compared to the previous year, 1902, the actual number of deaths shows a diminution of 1973, and the mortality per thousand one of 0·61.

The rate of mortality, as is usual, was highest in the Principal Town districts, where it was 17·7, and smallest in the Mainland-Rural districts, where it was 15·2. In the Large Town districts it was 16·6, in the Small Town districts 15·7, and in the Insular-Rural districts 16·0. Compared to the previous year, the mortality in the Principal Town districts shows a

		Aberdeen . . .	11·0	Renfrew . . . .	4·2	Kirkcudbright .	10·9
		Kincardine . . .	8·4	Ayr . . . . .	5·5	Wigtown . . .	12·3

decrease of 0·8, or 4·3 per cent.; that of the Large Town districts of 0·8, or 4·6 per cent.; that of the Small Town districts 0·2, or 1·3 per cent.; that of the Mainland-Rural 0·3, or 1·9 per cent.; and that of the Insular-Rural 1·0, or 5·9 per cent.

Of the total deaths, 35,856, or 47·20 per cent., were registered in the Principal Town districts; 9854, or 12·97 per cent., in the Large Town districts; 14,457, or 19·03 per cent., in the Small Town districts; 13,960, or 18·37 per cent., in the Mainland-Rural districts; and 1846, or 2·43 per cent., in the Insular-Rural districts.

The greatest mortality was registered in the first quarter of the year, when it amounted to 18·5, and the least mortality was in the third quarter, namely 14·4. In the second and fourth quarters it was intermediate, namely 16·7 and 16·8 respectively.

The daily average number of deaths for the entire year was 208. In January (261), December (241), February (219), March (216), April (215), and June (209) the daily average number of deaths was more than the mean; while in August (176), September (182), July (184), October (190), November (202), and May (203) the daily average of deaths was less than the mean.

Of the total deaths, 38,148 were males and 37,825 females. The mortality of males per thousand living males was 17·1, and of females 16·1. The death-rate of the male population was highest in the Principal Town districts, where it was 18·5, and smallest in the Mainland-Rural districts, where it was 15·3. The death-rate of the female population was also highest in the Principal Town districts, 16·9, and lowest in the Mainland-Rural districts, 15·0.

## MARRIAGES.

During the year 1903, 32,320 marriages were registered in Scotland, which is equivalent to a marriage-rate of 7·06 per thousand of the population—a rate very nearly the same as for the previous year. Of the total marriages, 17,252, or 53·4 per cent., were in the Principal Town districts; 4315, or 13·4 per cent., in the Large Town districts; 5791, or 17·9 per cent., in the Small Town districts; 4595, or 14·2 per cent., in the Mainland-Rural districts; and 367, or 1·1 per cent., in the Insular-Rural districts.

The marriage-rate was greater than the mean marriage-rate for Scotland in the Principal Town districts, where it was 8·5 per thousand, and in the Large Town districts, where it was 7·3 per thousand. It was less than the mean in Insular-Rural (3·2), Mainland-Rural (5·0), and Small Town Districts (6·3).

## EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND.

The following remarks refer to the births, deaths, and marriages in eight of the principal towns, viz.:—Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth. The information upon which these statements are based is compiled from the returns furnished periodically by the registrars of the registration districts of these towns. Corresponding information for the remaining districts of the country is not yet available, but when procured will be incorporated in the Annual Detailed Report for the year. As fully 37 per cent. of the population live

in these towns, and as fully 37 per cent. of the births and 40 per cent. of the deaths occur in these towns, it may be assumed that the conditions observed in them fairly accurately indicate those of Scotland.

### BIRTHS IN THESE EIGHT PRINCIPAL TOWNS.

During 1903 in these towns, with their combined population of 1,702,912, the births of 50,697 living children were registered. This is equivalent to an annual birth-rate of 29·8 per thousand, which is practically the same as the birth-rates of 1902 and 1901. From 1856 to

1903	1,702,912	50,697	29·8	30,863	18·1	15,074	8·9

1884 the birth-rate exceeded 35, from 1885 to 1900 it was between 30 and 35, and since 1901 it has been below 30.

The highest birth-rate was registered in Glasgow, where it amounted to 31·9, and the lowest in Perth, 24·4. In the other towns it was as follows:—Aberdeen, 31; Paisley and Leith, 29·9; Greenock, 29·5; Dundee, 29·2; and Edinburgh, 24·8. Compared to the previous year, Dundee, Aberdeen, and Perth show an increased birth-rate, while Edinburgh, Paisley, Leith, and Greenock show a decreased birth-rate. The birth-rate of Glasgow shows no change.

Of the 50,697 births in these towns, 3341, or 6·6 per cent., were illegitimate. This rate of illegitimacy is the same as it was in these towns in the previous year, and is, as usual, higher than the rate for the whole country. The rate of illegitimacy was highest in Dundee, where it was 8·7 per cent., and lowest in Leith, where it was 4·2 per cent; in Aberdeen it was 8·3, in Edinburgh 7·4, in Perth 6·6, in Glasgow 6·2, in Paisley 4·9, and in Greenock 4·5.

The estimated number of possible mothers of illegitimate children, *i.e.* the estimated number of unmarried women and widows between 15 and 45, is shown in Table VIII. The relation of illegitimate births to those numbers is found to be highest in Aberdeen, where for each hundred such possible unmarried mothers there were registered 1·73 illegitimate births, and least in Paisley, where for each hundred possible unmarried mothers there were 0·91 illegitimate births registered. The corresponding figures for the other towns were:—Dundee, 1·45; Glasgow, 1·37; Greenock, 1·02; Edinburgh, 1·00; Leith, 1·00; and in Perth, 0·94.

Of the 50,697 births, 25,661 were of males and 25,036 of females. There were thus 102·5 boys born to each 100 girls.

### DEATHS IN THESE EIGHT TOWNS.

The deaths of 30,863 persons were registered in these towns during the year, which is equivalent to a death-rate of 18·1 per thousand of the

TABLE VIII.—Births, Deaths, and Marriages, and their Proportion to the Population, during the Year 1903, in each of the following Principal Towns of Scotland; Estimated Number of Unmarried Women and Widows between 15 and 45 years of age; also the Illegitimate Births, and their Proportion to the Total Births, and to the Number of Possible Mothers.

TOWNS.	Population estimated to the middle of 1903.	BIRTHS.		Unmarried Women and Widows between 15 and 45.	ILLEGIT. BIRTHS.			DEATHS.		MARRIAGES.	
		Num- ber.	Rate per 1000 of the Pop.		Num- ber.	Per cent. to Total Births.	Percentage to Possible Mothers.	Num- ber.	Rate per 1000 of the Pop.	Num- ber.	Rate per 1000 of the Pop.
Glasgow . .	786,897	25,137	31·9	113,152	1,549	6·2	1·37	15,073	19·2	7,201	9·2
Edinburgh . .	327,441	8,110	24·8	59,805	601	7·4	1·00	5,524	16·9	3,043	9·3
Dundee . . .	162,805	4,750	29·2	28,433	411	8·7	1·45	2,945	18·1	1,360	8·4
Aberdeen . .	160,780	4,983	31·0	24,158	415	8·3	1·73	2,738	17·0	1,458	9·1
Paisley . . .	82,608	2,473	29·9	13,124	120	4·9	0·91	1,428	17·3	621	7·5
Leith . . .	79,552	2,379	29·9	9,902	99	4·2	1·00	1,286	16·2	555	7·0
Greenock . .	69,252	2,046	29·5	9,023	92	4·5	1·02	1,309	18·9	540	7·8
Perth . . .	33,577	819	24·4	5,758	54	6·6	0·94	560	16·7	296	8·8

population as estimated for the middle of the year. Of these deaths, 15,586 were of males, and 15,277 of females. This is the lowest death-rate recorded for these towns since these Reports were started. The previous lowest on record was in 1894 and 1896, when the rate was 18·9 per thousand. Previous to 1876 the death-rate of these towns was each year over 25; since 1876 it has been twenty-two times between 20 and 25, once over 25, and five times under 20. The death-rates of the five healthiest recorded years were 18·1 in 1903, 18·9 in 1894 and 1896, 19·0 in 1902, and 19·9 in 1888.

The highest death-rate is recorded in Glasgow, where it was 19·2 per thousand, and the lowest in Leith, where it was 16·2. In Greenock it was 18·9; in Dundee, 18·1; in Paisley, 17·3; in Aberdeen, 17·0; in Edinburgh, 16·9; and in Perth, 16·7.

When the death-rates of this year are compared with those of the previous year it is found that an increased mortality occurred in one town, Leith, and a decreased mortality in the remaining seven,

TABLE IX.—Death-rate per 1000 of the Population in each of Eight of the Principal Towns of Scotland during each of the Years 1893–1903.

Towns.	Death-rate per 1000 of the Population in										
	1893.	1894.	1895.	1896.	1897.	1898.	1899.	1900.	1901.	1902.	Mean of Ten Years.

TABLE X.—Death-rate of Children under Five Years of age in Eight of the Principal Towns of Scotland in 1903.

Towns.	Estimated Number of Living Children under 5 years in 1903.	Deaths under 5 years of age.		
		Number.	Rate per 1000 Children under five.	Percentage of Total Deaths.
Glasgow . . . . .	93,954	5,891	62·7	39·1
Edinburgh . . . . .	32,531	1,533	47·1	27·8
Dundee . . . . .	18,245	934	51·2	31·7
Aberdeen . . . . .	19,982	977	48·9	35·7
Paisley . . . . .	9,922	525	52·9	36·8
Leith . . . . .	9,878	492	49·8	38·3
Greenock . . . . .	8,443	456	54·0	34·8
Perth . . . . .	3,394	129	38·0	23·0

namely Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Greenock, and Perth. Compared to the mean annual mortality of the previous ten years, each of these towns shows a diminished death-rate, the diminution being most marked in Perth, Dundee, and Paisley.

The juvenile deaths, *i.e.* the mortality of children under five per thousand children under five living, in these eight towns is shown in Table X. The total number of children of less than five living in these towns is estimated to have been 196,349 in the middle of the year, the number of deaths of children under five registered during the year was 10,937, which is equivalent to a juvenile mortality of 55·7 per thousand. This rate is slightly higher than in the previous year, when it was 54 per thousand. The rate was highest in Glasgow, where it was 62·7, and lowest in Perth, where it was 38·0. In Greenock it was 54; in Paisley, 52·9; in Dundee, 51·2; in Leith, 49·8; in Aberdeen, 48·9; and in Edinburgh, 47·1. In Dundee, Paisley, Greenock, and Perth this rate shows a reduction as compared to that of the previous year, while in Glasgow, Edinburgh, Aberdeen, and Leith it shows an increase. The proportion of deaths under five years old to the total deaths at all ages for these eight towns combined is 35·4, which is 2·7 more than it was in the previous year, when it was 32·7. This proportion was greatest in Glasgow and Leith, and least in Perth and Edinburgh.

The number of deaths of children under one year is shown in Table XA. It amounted to 6966, which is equivalent to an annual infantile mortality of 137 per thousand live births. This infantile mortality was greatest in Greenock, 144; Glasgow, 143; and Dundee, 142; and was least in Perth, 99. In Leith it was 138; in Aberdeen, 136; in Paisley, 131; and in Edinburgh, 121. The combined deaths under one year amount to 22·6 per cent. of the total deaths in these towns.

Table XI. shows the number of deaths caused in each of these eight towns by certain diseases and groups of diseases, Table XII. the proportion of deaths from the various causes per 100,000 of the population, and Table XIII. the proportion of such deaths per 10,000 of the total deaths.

The principal epidemic diseases in these towns caused 148 deaths per 100,000 of the population, and this amounts to 815 deaths out of each

TABLE XA.—Death-rate of Infants under One Year of Age in Eight of the Principal Towns of Scotland during the Year 1903.

TOWNS.	Births in 1903.	Deaths under 1 year of age.		
		Number.	Rate per 1000 Births.	Percentage of Total Deaths.
Glasgow . . . . .	25,137	3,606	143·5	23·9
Edinburgh . . . . .	8,110	980	120·8	17·7
Dundee . . . . .	4,750	675	142·1	22·9
Aberdeen . . . . .	4,983	677	135·9	24·7
Paisley . . . . .	2,473	324	131·0	22·7
Leith . . . . .	2,379	328	137·9	25·5
Greenock . . . . .	2,046	295	144·2	22·5
Perth . . . . .	819	81	98·9	14·5

10,000 deaths registered. The absolute number of deaths from these epidemic diseases was 2494. Compared to the previous year the absolute number is found to be 50 less, the rate per 100,000 of the population to be 5 less, and the proportion per 10,000 total deaths to be 9 more. Per 100,000 of the population the rate of mortality from these diseases is found to be highest in Glasgow, 182, and Greenock, 167; and least in Perth, 72, and Dundee, 74. In Paisley it was 153, in Edinburgh it was 131, in Aberdeen 129, and in Leith 87. These infective diseases accounted for the largest proportion per 10,000 deaths in Glasgow, 949; Paisley, 886; and Greenock, 883; and least in Dundee, 408, and Perth, 431. In Edinburgh per 10,000 deaths 775 were due to these diseases, in Aberdeen 758, and in Leith 539.

Of these epidemic diseases Hooping-cough was the most fatal; deaths resulting from it amounted to 971, which is 110 more than in the previous year, and equivalent to a mortality of 58 per 100,000 of the population, and accounted for 318 out of every 10,000 deaths. The mortality from Hooping-cough was highest in Greenock and Glasgow, and lowest in Perth.

Next to Hooping-cough, Measles was the most fatal of these infectious diseases. To it 615 deaths are ascribed, which is 12 more than in the

TABLE XI.—Deaths from different Diseases in each of Eight of the Principal Towns of Scotland in 1903.

previous year, is equivalent to a mortality of 36 per 100,000, and to 201 per 10,000 of the total deaths. The death-rate from Measles was highest in Aberdeen and Glasgow. There were no deaths from it in Perth, and only 1 in Greenock.

Scarlet Fever caused 194 deaths, which is 57 less than in the previous year. The heaviest mortality due to it was in Paisley, where it was 44 per 100,000 of the population.

Diphtheria caused 222 deaths, which is 10 fewer than in the previous year. It was relatively most fatal in Perth.

Influenza accounted for 207 deaths, which is 137 fewer than in the previous year. It was relatively most fatal in Paisley and least so in Dundee.

Fevers accounted for 258 deaths, which is 49 more than during the previous year, the increase being due to an increased number of deaths from Enteric. Enteric Fever was relatively most fatal in Greenock, and least so in Aberdeen. There were 7 deaths from Typhus, as against 11 during the previous year; of them 6 were in Glasgow and 1 in Greenock.

\* Smallpox, Measles, Scarlet Fever, Influenza, Hooping Cough, Diphtheria, and "Fevers."

Diarrhœas caused 593 deaths, which is 115 more than in the previous year. These illnesses were relatively most fatal in Paisley and Dundee, and least so in Edinburgh and Perth.

Pneumonia caused 2781 deaths during the year, which is 585 fewer than in the previous year. To it 910 per 10,000 of the total deaths in these towns were due, and by it the death of 165 per 100,000 of the population of these towns was caused. Deaths caused by it per 100,000 were 199 in Glasgow, 167 in Leith, 164 in Greenock, 163 in Dundee, and fewer than 130 in the remaining towns.

Tuberculous diseases were the cause of death in 4149 instances, Phthisis being accountable for 2748, and other tuberculous diseases for 1401. The deaths from Phthisis are 22 fewer than in the previous year, those from other tuberculous diseases are 45 more than in that year. Tuberculous diseases in these towns caused 246 deaths per 100,000 of the population, which is a slightly lower rate than that of the previous year. The similar rate for Phthisis was 163, which is 4 fewer than in the previous year. The relative mortality from all tuberculous diseases was highest in Perth, 290, and lowest in Paisley, 205. In Dundee it was 262; in Leith, 259; in Glasgow, 254; in Greenock, 251; in Edinburgh, 233; and in

\* Smallpox, Measles, Scarlet Fever, Influenza, Hooping Cough, Diphtheria, and "Fever."

Aberdeen, 217. Phthisis was relatively most fatal in Perth, 204, and least so in Paisley, 130. In Glasgow and Dundee this rate was 170; in Leith and Greenock, 167; in Edinburgh, 152; and in Aberdeen, 149. Compared to the previous year the mortality from all tuberculous diseases is found to have been more in Perth, Leith, and Aberdeen, and to have been less in Glasgow, Edinburgh, Dundee, Paisley, and Greenock.

Malignant disease accounted for 1472 deaths in these towns, which is equivalent to an annual mortality of 87 per 100,000 of the population, and is 51 fewer than in the previous year. It was relatively most fatal in Edinburgh.

To Old Age 1092 deaths are attributed, which is 52 fewer than in the previous year. Deaths of 102 persons over 90 were registered during the year; of them 25 were males and 77 females. One female was aged 103, another 101, and another 100.

Deaths from Violence numbered 1251, which is equivalent to a mortality of 74 per 100,000, and is 69 fewer than in the previous year. Of those deaths 7 were homicidal, 80 suicidal, and 1164 accidental. Of the 80 suicides, hanging and cut-throat were the means adopted each in 27 instances, drowning in 10 instances, shooting in 8, precipitation in 3, poisoning in 2, and coal-gas poisoning, railway train, and suffocation in 1 case each. Of the accidental deaths 181 are ascribed to burning, 128 to drowning, 156 to suffocation, of which 69 were cases of overlying, 55 to vehicles and horses, and 50 to poisons or poisonous vapours.

There were no deaths by execution.

### MARRIAGES IN THESE TOWNS.

The number of marriages and the marriage-rates are shown in Table VIII. The total number of such marriages was 15,074, which is equivalent to an annual rate of 8·9 per thousand of the population, and is 55 fewer than the number for the previous year. The marriage-rate was greatest in Edinburgh, 9·3, and least in Leith, 7·0. In Glasgow it was 9·2, in Aberdeen 9·1, in Perth 8·8, in Dundee 8·4, in Greenock 7·8, and in Paisley 7·5.

### WEATHER AND ITS INFLUENCE ON MORTALITY.

The remarks made in this section on the weather of the year are based on notes made by Dr. Buchan, under the Council of the Scottish Meteorological Society, and which appeared in the Registrar-General's Monthly Reports.

The year 1903 was characterised by a subnormal mean temperature, and by a very excessive rainfall. The average of the mean annual temperature of the last twenty years is 46·2, the mean temperature of 1903 was 45·9. The average rainfall of the last twenty years is 39 inches, the rainfall of 1903 amounted to 51·5 inches. During the last twenty years there have been five years with excessive rainfalls, but in no other has there been excessive rain combined with a low mean temperature. Of the previous wet years, two had a mortality less than the average, one a mortality of average amount, and one of more than the average. In 1903, with its very excessive rainfall, the mortality has been considerably less than the average. It would thus appear that recent experience tends to

show that an excessive rainfall is not of necessity an unfavourable weather condition, and does not necessarily mean a large mortality.

A comparison of 1903 with 1902 shows that the chief difference from the weather point of view was the rainfall, the mean annual temperature being in these two years not very different. A comparison of the health conditions of these two years, as indicated by the mortality in the principal towns, shows that in the wet year 1903 the health conditions were not

adversely affected, and, in fact, the converse appears to be the case. In the principal towns the total deaths were fewer, deaths from infectious disease were fewer, deaths from pneumonia were fewer, deaths from other diseases of the respiratory organs were fewer, and so were deaths from old age; deaths from phthisis and other tuberculous diseases were only very slightly more numerous, but not sufficiently so to raise the mortality from these diseases per thousand. Diarrhoeas and the deaths of children under one year both show an increased mortality, the mortality due to the former having risen from 29 per 100,000 to 35, and that of children under one year from 129 per 1000 births to 137.

January was characterised by a mean barometric pressure a little below the average, with a slightly high monthly range; a mean temperature about a degree below the average, with a mean daily range also below the average; a rather low mean humidity; a mean rainfall greatly above the average, and falling on 3 days more than the average number; a 3 days' excess of Easterly winds. Compared to the previous January, this month had a lower mean temperature and a much greater rainfall, the total deaths numbered nearly 300 more, this increased number being due to a greater mortality from diseases of the respiratory organs, hooping-cough, and the deaths of premature children.

February was characterised by a mean barometric pressure somewhat below the average, with a very high monthly range; an exceedingly high mean temperature, with a slightly high mean daily range; a low humidity; a mean rainfall nearly twice the average, and falling on 3 days more than the average number; a remarkable deficiency of winds from N. and E. Compared to the previous February the month had a much higher mean temperature, and a very much greater rainfall. The total deaths were 603

\* Including Pneumonia.

fewer, that being to a large extent due to a lesser mortality from diseases of the organs of respiration.

March was characterised by an exceedingly low mean barometric pressure, with a monthly range about the average; a somewhat high mean temperature, with a slightly high mean daily range; an average humidity; a mean rainfall more than twice the average, and falling on 12 days more than the average number; a remarkable excess of strong winds from S. and S.W. Compared to the previous March the month had a very similar temperature and a much heavier rainfall. The deaths were 414 fewer, the difference being to a large extent due to fewer deaths from diseases of the organs of respiration.

April was characterised by a somewhat low mean barometric pressure, with a rather low monthly range; a very low mean temperature, with a mean daily range about the average: a low mean humidity; a mean rainfall below the average, but falling on 2 days more than the average number; a considerable excess of winds of about average force from N.W. and N. Compared to April of the previous year this month had a lower mean temperature and a similar rainfall. Deaths were 576 fewer, the difference being largely due to fewer deaths from diseases of the organs of respiration and phthisis.

May was characterised by a somewhat low mean barometric pressure, with a slightly high monthly range; a mean temperature slightly below the average, with an average mean daily range; a mean humidity a little above the average; a mean rainfall slightly below the average, and falling on the average number of days; a considerable excess of winds of moderate force from N.E. and E. Compared to the previous May this month was 2·8 degrees warmer, and had 0·3 inch less rain. There were 238 fewer

deaths; the deaths from diseases of the respiratory organs, those from diarrhoeas, and those from old age were each fewer.

June was characterised by an exceedingly high mean barometric pressure, with an extremely low monthly range; a rather low mean temperature, with a mean daily range about equal to the average; an average mean humidity; a somewhat low mean rainfall, falling on 1 day less than the average number; a remarkable excess of winds of about average force from between N. and S.E. Compared to the previous June the month had a rather higher mean temperature and a slightly greater rainfall. The deaths were of nearly the same number as in the previous June.

July was characterised by a rather low mean barometric pressure, with a very low monthly range; a rather low mean temperature, with a slightly low mean daily range; a mean humidity a little above the average; a high mean rainfall, falling on 3 days more than the average number; a great excess of winds of rather more than average force from between N. and S.E. Compared to the previous July this month had a slightly higher

TABLE XVII.—Monthly Deaths at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1903, and Proportion at each Age in every Hundred Deaths per Month.

YEAR . . . . .	11,148	2,287	10,521	7,502	31,458	12,000

mean temperature and a much greater rainfall. The deaths were slightly below those of the previous July.

August was characterised by an extremely low mean barometric pressure, with a high monthly range; a low mean temperature, with an average mean daily range; an average mean humidity; a very high mean rainfall, falling on 6 days more than the average number; a large excess of winds of considerably more than average force from a Westerly quarter. Compared to the previous August this month had very nearly the same mean temperature, but had a rainfall of nearly double the amount. The total deaths were 190 more, this being partly due to a greater mortality from phthisis, from diarrhœas, and to the deaths of premature children.

September was characterised by a rather high mean barometric pressure, with a slightly low monthly range; a slightly low mean temperature, with an average mean daily range; a mean humidity fractionally above the average; a slightly low mean rainfall, falling on 1 day more than the average number; a very large excess of winds of average force from a South-easterly quarter. Compared to the previous September the month had a slightly lower mean temperature and a greater rainfall. The deaths were more numerous—an increase of 140—the increase being partly due to an increased number of deaths from diarrhœas.

October was characterised by an abnormally low mean barometric pressure, with a rather low monthly range; a slightly high mean temperature, with a slightly low mean daily range; a mean humidity about the average; an abnormally high mean rainfall, falling on 10 days more than the average number; a very large excess of winds of average force from a Southerly quarter. Compared to the October of the previous year this month had very nearly the same mean temperature, but the rainfall was very much greater. The deaths were 83 fewer, and those of the organs of respiration much fewer, than in the previous year. Deaths from phthisis were, however, rather more.

November was characterised by a somewhat high mean barometric pressure, with a rather low monthly range; a slightly high mean temperature, with a slightly high mean daily range; a mean humidity about the average; a mean rainfall considerably below the average, but falling on 2 days more than the average number; a large excess of winds of about average force from West and North-west. Compared to the previous November this month had a lower mean temperature and a rather smaller rainfall. The total deaths were 176 more than in the previous year, this being partly due to an increased number of deaths from phthisis and from diseases of the organs of respiration.

December was characterised by a low mean barometric pressure, with a slightly low monthly range; a low mean temperature, with a slightly low mean daily range; a somewhat low mean rainfall, but falling on 1 day more than the average number; a very large excess of winds of moderate force from a S.E. quarter. Compared to the December of the previous year this month had a lower mean temperature and a smaller rainfall. The total deaths were of nearly the same number. Deaths from phthisis, measles, and diseases of the organs of respiration were more, but deaths from hooping-cough were less.

The total monthly deaths were more numerous in the winter than in the summer months, as were also the deaths from diseases of the organs of respiration and from old age. The mortality from phthisis was greatest in

January and March, and least in July and August. Deaths from diarrhoeas were, as usual, most numerous in the summer months.

Among children under 5 the deaths were most numerous in January, November, and December, and fewest in July and August. Among adolescents deaths were most numerous in January, February, March, June, and December, and fewest in October and November. Among adults of from 20 to 60 deaths were most numerous in January and December, and fewest in August and September. Among old people January was the most fatal month, and August the least fatal.

# THIRTY-NINTH ANNUAL REPORT

## ON THE

# VACCINATION OF CHILDREN

### BORN IN SCOTLAND IN 1902.

The Vaccination Returns for the year ending 31st December 1902 show that, of the 132,360 living children whose births were registered during that year, 112,321 were successfully vaccinated, which is equivalent to 84·860 per cent. of those births. Certificates of postponement were granted in 2858 cases, or 2·159 of the total births; 512, or 0·387 per cent., were certified as constitutionally insusceptible of vaccination; and 454, or 0·343

TABLE XIX.—Vaccinations in Scotland, 1892-1902, and Proportion to the Births each Year.

per cent., as having been previously vaccinated by persons not qualified to give the necessary certificates. No children were certified as being insusceptible from having had small-pox. 12,239 children, or 9·247 of the total births, died before vaccination. 3976 children were, by leaving the registration district or from other cause, unaccounted for, that number being equivalent to 3·004 of the total births. When these figures are compared with the averages of the previous years, it is found that the percentage of successful vaccinations is above the average, that of postponement also above the average, that of insusceptibility below, from insusceptibility due to previous vaccination above, from death before vaccination below, and from non-registration through removal above the average.

When the vaccinations are calculated in relationship to the number of children living at the time when they should have been vaccinated, the same comparison does not bring out a similar result, for the percentage of children successfully vaccinated is found to be less than the average—93·5 as compared to 94—the difference being due to the relatively greater number of children living at the time when vaccination should be registered.

Calculated after deducting from the total births the number of children who died before they should be vaccinated, it is found that the percentage of successful vaccinations was 93·507, that of postponement 2·379, that of insusceptibility 0·426, that of having been previously vaccinated 0·378, and that for removal from the registration district 3·010.

Deaths from small-pox in the eight principal towns in Scotland during 1903 numbered 27, which is 17 fewer than in 1902, 8 more than the annual average of the decade 1885 to 1894, 17 more than the average of the decade

TABLE XX.—Vaccinations in Scotland, 1892–1902, deducting from the Births those who died before they could be Vaccinated, and giving the Proportion of the Vaccinated to the surviving Births of each year.

1875 to 1884, but 338 fewer than the annual average of the decade 1865 to 1874, and 514 fewer than that of the decade 1855 to 1864. Of the 27 deaths, in 12 instances they were reported as of vaccinated persons, in 7 instances as of unvaccinated persons, in 8 instances it was not stated whether the person was vaccinated or not.

The number of the total small-pox deaths in Scotland during 1903 is not available and cannot here be referred to.

N.B.—Districts containing Parliamentary and Royal Burghs are printed in capitals, thus—EDINBURGH. Districts containing Police Burghs or Towns of 2000 Inhabitants and upwards are printed in small capitals, thus—CANONBARR. An asterisk "\*" is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more than one Parish. A dagger "†" is prefixed to those Districts which consist of only a part of the Civil Parish of the same name.

The component parts of these Districts will be found on page 56.

No. of District.	REGISTRATION DISTRICTS.	POPULATION.		BIRTHS, DEATHS, AND MARRIAGES. 1903.			VACCINATIONS, 1902.

# A P P E N D I X.

## V A C C I N A T I O N , 1902.

### EXTRACTS FROM THE REGISTRARS' NOTES RELATIVE TO THE WORKING OF THE VACCINATION ACT.

#### I.—NORTHERN DIVISION.

##### 4. SUTHERLAND.

44 (2). STÖER.—Ten cases unvaccinated ;  
Hooping Cough prevalent.

#### II. NORTH-WESTERN DIVISION.

##### 5. ROSS AND CROMARTY.

###### *Insular.*

86*l*. CARLOWAY.—Vaccination hindered by  
the prevalence of Measles.

##### 6. INVERNESS.

###### *Mainland.*

103. KIRK HILL.—In some cases Vaccination  
has been delayed by the prevalence of Hooping  
Cough, and in others owing to difficulty in  
tracing ploughmen who have left the parish.

###### *Insular.*

103. BARRA.—A number of the cases entered  
in column 7 are reported to have been vaccin-  
ated, but certificates to that effect have not yet  
been received.

111 (1). NORTH HARRIS.—Vaccination delayed  
owing to epidemics of Hooping Cough and  
Measles.

111 (2). SOUTH HARRIS.—The work of Vac-  
cination is behind owing to the district being  
for a considerable time without a medical  
practitioner.

#### III. NORTH-EASTERN DIVISION.

##### 8. ELGIN (OR MORAY).

130. DRAINIE.—An epidemic of Measles and  
of Hooping Cough caused a number of deaths,  
and was the ground on which a large number of  
certificates of postponement were granted.

##### 10. ABERDEEN.

168 (2). ST. MACHAR.—Of the forty-three cases  
entered in column 7, twelve were postponed to  
dates prior to 31st December 1903, sixteen are  
reported as having left the district, and fifteen  
are under the consideration of the Parish Council.

183 (2). CRATHIE.—Vaccination very well  
attended to in this district.

#### IV. EAST-MIDLAND DIVISION.

##### 13. PERTH.

330. AUCHTERGAVEN.—Vaccination is often  
delayed from various causes, but is never  
refused.

##### 14. FIFE.

416. COLLESSIE.—The number of children  
who died before Vaccination is greater than  
usual, and includes a case of triplets, all of  
whom died within a few days of birth.

#### V. WEST-MIDLAND DIVISION.

##### 17. STIRLING.

486. MUIRAVONSIDE.—The abnormal number  
entered in column 7 is due to removals con-  
sequent on the closing of four large coal-pits in  
the district.

##### 18. DUMBARTON.

501. OLD KILPATRICK.—Of the sixty-five cases  
entered in column 7, the parents of about fifty  
are on the list of defaulters, and are being dealt  
with by the Parish Council.

#### VII. SOUTH-EASTERN DIVISION.

##### 24. LINLITHGOW.

673 (1). WHITBURN.—Four prosecutions during  
the year.

##### 25. EDINBURGH.

692 (1). NORTH LEITH.—Of the fifty-nine cases  
entered in column 7, ten are reported to have  
been vaccinated.

##### 26. HADDINGTON.

713. NORTH BERWICK.—Regarding the case  
returned as "removed from the district before  
vaccination," the Registrar is informed by the  
father, who has gone abroad, that the child has  
been vaccinated.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES  
BY AN ASTERISK (\*).

No.	Districts.	Component Parts (Parishes).
13	Birsay . . . . .	Part of Harray and Birsay.
14	Deerness . . . . .	Part of St Andrews and Deerness.
18	Harray . . . . .	Part of Harray and Birsay.
22	North Ronaldshay . . . . .	Part of Cross and Burness.
25	St Andrews . . . . .	Part of St Andrews and Deerness.
26	Sanday . . . . .	Lady, and part of Cross and Burness.
37b	Keiss . . . . .	Parts of Canisbay and Wick.
58	Applecross . . . . .	(1) Part of Applecross; (2) Remainder of Applecross and part of Gairloch.
59b	Carnoch . . . . .	Parts of Contin and Urray.
86b	Carlaway . . . . .	Parts of Barvas and Uig.
87	Lochs . . . . .	Lochs, and part of Uig.
92b	Cannich . . . . .	Parts of Kilmorack and Kiltarity.
112	Kilmuir . . . . .	(1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort.
135	Elgin . . . . .	Elgin, and parts of New Spynie and St Andrews-Lhanbryde.
152	Enzie . . . . .	Parts of Bellie and Rathven.
155b	Glenrinnies . . . . .	Parts of Aberlour and Mortlach.
167	Seafeld . . . . .	Parts of Cullen and Rathven.
171b	Ardallie . . . . .	Parts of Cruden, Ellon, Longside, and Old Deer.
210b	Kinninmonth . . . . .	Parts of Crimond, Longside, Lomnay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar . . . . .	Logie Coldstone, and part of Glenmuick.
222b	Millbren . . . . .	Parts of Fyvie and Monquhitter.
227b	New Pituligo . . . . .	Parts of Aberdour, New Deer, Strichen, and Tyrie.
231	Peterculter . . . . .	(1) Parts of Aberdeen and Peterculter; (2) Remainder of Peterculter.
237b	Savoch . . . . .	Parts of Ellon, New Deer, Old Deer, and Tarves.
249b	Ythan Wells . . . . .	Parts of Auchterless and Forgue.
266	Nigg . . . . .	Nigg, and part of Aberdeen.
282	Dundee . . . . .	Dundee Combination, and part of Mains and Strathmartine.
294b	Kilry . . . . .	Parts of Glenisla and Lintrathen.
324	Aberfeldy . . . . .	Parts of Dull, Kenmore, and Logierait.
330	Auchtergaven . . . . .	Parts of Auchtergaven and Logiealmond.
331	Balquhidder . . . . .	Balquhidder, and part of Comrie.
344	Dowally . . . . .	Part of Dunkeld and Dowally.
349	Dunkeld . . . . .	Part of Dunkeld and Dowally.
355b	Foss . . . . .	Parts of Blair-Athol and Dull.
361	Killin . . . . .	Parts of Kenmore and Killin.
375	Logiealmond . . . . .	Parts of Logiealmond, Little Dunkeld, and Methven.
379	Meikle . . . . .	Meikle, and part of Coupar-Angus.
386b	Perse . . . . .	Parts of Ayrth, Blairgowrie, and Kirkmichael.
387	Perth . . . . .	Perth, and part of Kinnoull.
393b	Stanley . . . . .	Parts of Auchtergaven, Kinclaven, and Redgorton.
394b	Strathfilan . . . . .	Part of Killin.
394c	Tenantry . . . . .	Parts of Blair-Athol and Moultn.
402	Anstruther-Easter . . . . .	Anstruther-Easter, and part of Kilrenny.
417	Crail . . . . .	Part of Crail and May Island.
423	Dunbog . . . . .	Dunbog, and part of Flisk.
425	Dunino . . . . .	Dunino, and part of Crail.
442	Kirkcaldy and Abbotshall . . . . .	Part of Kirkcaldy and Dysart.
457b	Thornton . . . . .	Part of Kirkcaldy and Dysart and of Markinch.
483	St Ninians . . . . .	Parts of St Ninians and Stirling.
490	Stirling . . . . .	Parts of St Ninians and Stirling.
496	Dumbarton . . . . .	Dumbarton, and parts of Cardross and Old Kilpatrick.
504	Ardochattan . . . . .	Part of Ardochattan and Muckairn.
505	Ardnamurchan . . . . .	(1) Parts of Ardnamurchan and of Arisaig and Moldart.
506	Bailachulish, etc. . . . .	Parts of Kilmallie and Ardgour.
509	Cumlodden and Minard . . . . .	Parts of Glassary and Inveraray.
515	Kilbrandon and Kilchattan . . . . .	Kilbrandon and Kilchattan, and part of Jura.
517	Kilchrenan, etc. . . . .	(1) Parts of Kilchrenan and Dalavich, and Glenorchy and Inishail; (2) Remainder of Kilchrenan and Dalavich.
520	Kilmallie . . . . .	Parts of Kilmallie and Ardgour.
525	Lismore . . . . .	Lismore and Appin, and part of Ardgour.
526	Lochgillhead . . . . .	Parts of Glassary and South Knapdale.
529	Muckairn . . . . .	Parts of Ardochattan and Muckairn, and Glenorchy and Inishail.
535	Tarbert . . . . .	Parts of Kilcalmonell, Saddell and Skipness, and South Knapdale.
536	Bowmore (or Kilarrow) . . . . .	Part of Kilarrow and Kilmeny.
543	Kilmeny . . . . .	Part of Kilarrow and Kilmeny.
545	Kinlochspelve . . . . .	Part of Pennygown and Torosay.
547	Portnahaven . . . . .	Part of Kilchoman.
548	Salen . . . . .	Parts of Kilninian and Kilmore, and Pennygown and Torosay.

		Broughton, . . 758	Catrine, . . . 613	Creich (Fife), 418

\* The actual number of Districts is 1073—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 7 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place compound names in the order in which they are pronounced.

Creich (Sutherland), . . . 46	Dunbarney, . . . 347	Findo-Gask, . . . 352	Graitney (or Gretna), . . . 827	Keiss, . . . 37
